The meta data dialogue is completely customisable. For Bradford, it contains minimum EGMS requirements, plus some Dublin Core items and optional data where the page represents an Event. Many terms are automatically populated, or where editing is allowed, have default values (e.g. Language is preset to 'eng'). Clicking on '...' next to IPSV opens the IPSV Browser.

<input type="radio"/>	6274	Noisy neighbours	K	No, use Problems with neighbours		
<input type="radio"/>	4778	Vehicle watch schemes	K	No, use Neighbourhood watch		

Terms that match are shown in a grid. Categories (preferred terms) are ranked highest, but both Categories and Keywords can be selected. Where a term is overridden by a preferred term, the user can click to go to that term to select it.

Clicking on "Related Items" for a term takes the user to related items as defined by the IPSV.

Search Term

	ID	Name	C/K	Preferred	Related	Broader
<input checked="" type="radio"/>	4775	Neighbourhood watch	C	Yes	2 related items	2 broader items
<input type="radio"/>	4777	Boat watch schemes	K	No, use Neighbourhood watch		
<input type="radio"/>	4776	Neighbourhood watch schemes	K	No, use Neighbourhood watch		
<input type="radio"/>	4778	Vehicle watch schemes	K	No, use Neighbourhood watch		

Also, if an IPSV ID is known, that can be entered in the search instead. In this case 4776 is entered but 4775 is the preferred term so the search returns the choice of both, plus all other items which are non-preferred versions of 4775.
